会烤化汽车的大楼

The Building That Melted a Car

弯曲的玻璃墙，怎么会烤坏汽车？

英文原文

On 2 September 2013 the news broke that a London **skyscraper under construction** had damaged a Jaguar. Martin Lindsay had left the **saloon** by the **pavement** on Eastcheap, opposite the tower's **frontage**. He returned to find its wing mirror **warped**, its panels **deformed** and its **badge distorted**. The **glazed facade** above was to blame.

Rafael Viñoly curved the south face of 20 Fenchurch Street inward, **enlarging** the upper **storeys**, where **tenants** pay a **premium**. That **geometry** acted like a **magnifying** glass, focusing **sunlight** into a **beam** up to six times brighter than direct sun. It was measured at about 110 degrees Celsius, and a **reporter** fried an egg in a **pan** using the **reflection**.

The **developers** issued an **apology** and **reimbursed** almost 1,000 pounds for repairs. Parking bays were **suspended** and a **provisional barrier** was **erected**. The beam struck for about two hours a day, two to three weeks **annually**, because of the sun's **angle of elevation**. Newspapers dubbed the Walkie-Talkie the Walkie-Scorchie, a **taunt**.

The **architect** was **candid**, admitting many mistakes. Viñoly had **anticipated** the focusing, he said, but not its **intensity**. **Sun louvres** in the original design were reportedly removed in **cost-cutting**. Nor was this his first **architectural miscalculation**. In 2010 the **infamous glare** from his curved, **reflective** Vdara hotel in Las Vegas burned a guest's **scalp** by the pool.

On 12 February 2014 a **permanent fixture** was announced: **horizontal aluminium fins** to **diffuse** the **brightness**, reportedly costing several million pounds. In September 2015 Building Design's **critics** gave the **notorious** tower the Carbuncle Cup, a **trophy** for the UK's worst new building. The **ballot** was **unanimous**.

中文译文

2013年9月2日，一则新闻传开，说伦敦一座正在建设中的摩天大楼损坏了一辆捷豹车。马丁·林赛把这辆轿车停在伊斯特奇普街的人行道旁边，正对着这座高楼的正面。他回来时发现，车的后视镜已经翘曲，车身板变形，并且车标也扭曲了。上方那面镶玻璃的正面墙是罪魁祸首。

拉斐尔·维诺利（在设计中）将芬丘奇街20号的南立面向内弯曲，扩大了上部楼层，那里的租户支付着溢价（更高的租金）。这种几何形状就像一面放大镜，把阳光汇聚成一道光束，亮度可达直射阳光的六倍。测得的温度约为110摄氏度，一名记者还在平底锅里利用反射光煎熟了一个鸡蛋。

开发商作出了道歉，并赔付了近1,000英镑的修理费。路边停车位暂停使用，并且一道临时的屏障被搭建了起来。这道光束每年会照射两到三周、每天约照射两小时，因为这是太阳的仰角。报纸把对讲机大楼戏称为“烤焦机大楼”，这是一句嘲讽。

这位建筑师很坦率，承认犯了很多错误。维诺利说，他预料到了外墙会聚光，却没想到聚光的强度会这么大。据报道，原设计中的遮阳百叶在削减成本时被删掉了。这也不是他第一次出现建筑上的失算。2010年，他那座位于拉斯维加斯、弯曲反光的维达拉酒店反射出臭名昭著的强光，在泳池边灼伤了一位客人的头皮。

2014年2月12日，一项永久性的固定装置方案公布，那就是在外墙加装水平的铝制散光鳍片，来散射光线、减弱亮度，据报道花费达数百万英镑。2015年9月，《建筑设计》杂志的评论家们将“烂疮杯”颁给了这座声名狼藉的/臭名远扬的大楼，这是一个专门颁给英国最糟糕新建筑的奖杯。这次投票全体一致。

词汇与表达

skyscraper n.
摩天大楼

under construction 介词短语
正在建设中的
a London skyscraper under construction

saloon n.
轿车

pavement n.
人行道

frontage n.
正面

warped adj.
翘曲
its wing mirror warped

deformed adj.
变形
its panels deformed

badge n.
车标

distorted adj.
扭曲了
its badge distorted

glazed adj.
镶玻璃的

facade n.
正面墙
The glazed facade

enlarging v.
扩大了

storeys n.
楼层

tenants n.
租户

premium n.
溢价
tenants pay a premium

geometry n.
几何形状
That geometry acted

magnifying adj.
放大

sunlight n.
阳光

beam n.
光束
focusing sunlight into a beam

reporter n.
记者

pan n.
平底锅

reflection n.
反射光
using the reflection

developers n.
开发商

apology n.
道歉

reimbursed v.
赔付了
reimbursed almost 1,000 pounds

suspended v.
暂停使用

provisional adj.
临时的
a provisional barrier

barrier n.
屏障

词汇与表达（续）

erected v.
搭建了起来
a provisional barrier was erected

annually adv.
每年

angle of elevation n.
仰角

taunt n.
嘲讽

architect n.
建筑师

candid adj.
坦率
The architect was candid

anticipated v.
预料到了
had anticipated the focusing

intensity n.
强度
not its intensity

Sun louvres n.
遮阳百叶

cost-cutting n.
削减成本
removed in cost-cutting

architectural adj.
建筑上的

miscalculation n.
失算
architectural miscalculation

infamous adj.
臭名昭著的

glare n.
强光
the infamous glare

reflective adj.
反光的

scalp n.
头皮

permanent adj.
永久性的

fixture n.
固定装置
a permanent fixture

horizontal adj.
水平的

aluminium n.
铝制

fins n.
鳍片

diffuse v.
散射
to diffuse the brightness

brightness n.
亮度

critics n.
评论家

notorious adj.
声名狼藉的/臭名远扬的

trophy n.
奖杯

ballot n.
投票
The ballot was unanimous

unanimous adj.
全体一致
The ballot was unanimous

文章简述

- 事故：2013年，伦敦芬丘奇街20号、俗称对讲机的大楼，把阳光反射到街边，将马丁·林赛的捷豹车烤得变形。
- 原理：内凹的玻璃南墙扩大了租金更高的上层面积，也像凹面镜，把反射的阳光集中到街面；光束亮度最高为直射阳光六倍，受照处温度约110°C。
- 应急：开发商赔偿近千英镑，停用车位并设屏障；由于太阳高度角变化，这种强光每年只出现两三周、每天约两小时。
- 失算：建筑师维诺利预料到聚光，却低估了强度；遮挡阳光的百叶板据报因省钱被删，他设计的另一酒店也曾反光灼伤客人。
- 整改：2014年公布在外墙加装横向铝片、分散光线的方案，据报需数百万英镑；2015年，这座楼获颁英国最差新建筑的烂疮杯。
