洞穴里的十三个人

Thirteen in the Cave

找到十三人之后，为什么救他们出洞仍如此困难？

英文原文

On 23 June 2018, twelve boys aged 11 to 16 from a **junior** football **squad went on an outing** with their 25-year-old **assistant coach**. They **entered** Tham Luang, a **sprawling maze** of **tunnels** in northern Thailand, to **penetrate** its **gloom**. **Monsoon** rain then **flooded** the **passages**, and the rising water trapped all of them.

For nine days their **whereabouts** were unknown. On 2 July two **elite** British **divers**, **threading through submerged passages**, reached an **inundated** chamber about 4 km from the **entrance**. All 13 were there, **huddled** on a **muddy mound** and **perched** just above the water, every one of them **alive**.

The only **exit ran through kilometres** of **constricted**, **treacherous passages**, many of them **navigable** only with **scuba** gear. **Rescuers** began **stockpiling** oxygen **cylinders along the route**. On 6 July Saman Kunan, a **former** Thai Navy SEAL, fell **unconscious** while laying them and died.

The **evacuation** began on 8 July, and the boys came out **in batches**. Each was given **doses** of **sedative**, **wrapped motionless** in a **stretcher**, and passed from diver to diver, with **medics stationed along the route**. On 10 July the last four **footballers** and their coach were **escorted** out after their **teammates**.

The **multinational mobilisation** was a feat of **logistics**. Some 10,000 people **converged on** the site, including a **contingent** of more than 100 divers, plus 2,000 soldiers and 900 **policemen**, with teams **deployed** from abroad. The rescue had a **sobering postscript**: in December 2019 another Navy SEAL died of a **blood infection** caught during the operation. Every boy came home alive, and two rescuers were **mourned**.

中文译文

2018年6月23日，12名男孩，年龄在11至16岁，来自一支青少年足球小队，外出郊游，同行的是他们25岁的助理教练。他们进入了睡美人洞，那是一座由隧道构成、向四周分散延伸的迷宫，位于泰国北部；他们想要穿透/深入洞中的幽暗。季风带来的雨水随后淹没了通道，而上涨的水把他们全部困住了。

九天里，他们的下落不明。7月2日，两名英国精英潜水员穿过水下通道，到达一个被淹的洞室，距离洞穴的入口大约4公里。13人都在那里，挤在一起在一处泥泞的土堆上，刚好栖身于水面之上，他们每个人都还活着。

唯一的出口要穿过数公里狭窄且暗藏危险的通道，其中许多段只有借助水肺装备才能通行。救援人员开始储备氧气钢瓶，放在沿途。7月6日，萨曼·古南，一名前泰国海军海豹突击队员，在布放钢瓶时失去知觉，随后死亡。

撤离开始于7月8日，男孩们分批出洞。每人都用了数剂镇静药，一动不动地包裹在担架里，由潜水员一个接一个传递出去，伴随着医护人员驻守在沿途。7月10日，最后四名小球员和教练继队友之后被护送出洞。

这场多国的动员被堪称为一场后勤壮举。约1万人汇集到现场，其中包括一支100多名潜水员组成的分队，另有2,000名士兵和900名警察，还有一些救援小组，从国外调派而来。这次救援留下了一个令人警醒的后续：2019年12月，又一名海军海豹突击队员死于在救援中染上的血液感染。每个男孩都活着回到了家，而两名救援者却只能永远被悼念。

文章简述

- 被困：2018年，泰国12名少年球员和助理教练进入睡美人洞，因季风雨淹没通道而受困。
- 发现：失联九天后，两名英国潜水员在距洞口约4公里处找到他们，十三人全部活着。
- 难题：救援需穿过数公里狭窄水道；约万人的多国队伍沿途布放气瓶，协调百余名潜水员。
- 救出：7月8日至10日，男孩用镇静药后固定在担架中，由潜水员接力带出，沿途有医护协助。
- 代价：十三人全获救；救援者萨曼·古南在前期布气瓶时遇难，另一名救援队员2019年死于救援时染上的血液感染。
